Subject: Yucca Mtn site recommendation

Part of Records Package / Supplement / Correction

Dear Secretary of Energy,

As reported in an article from NEI's website, "Energy Department Scientific Report Supports Nuclear Fuel Repository at Yucca Mountain Washington, D.C., August 21, 2001-The body of scientific evidence supporting the approval of Yucca Mountain, Nev., as the site for a proposed repository for high-level radioactive waste increased greatly today with the Energy Department's release of a favorable preliminary site suitability evaluation report.

The report upholds earlier scientific findings on Yucca Mountain's suitability for the underground disposal facility. The facility would be built to safely isolate used nuclear fuel from commercial nuclear power plants and high-level radioactive waste from U.S. defense programs. "

I believe that there is no reason for delay in recommending Yucca Mountain as the high-level waste disposal facility. For a promising future of electric utility and nuclear industry, it is crucial that this recommendation be made as soon as possible. I support this position as a member of the public and as a worker in the industry.
